

M7220 Terminal Accessories

AML's quality accessories make your work experience more efficient and productive. AML offers a full range of M7220 terminal accessories to complement your data collection application and work environment – from single user, to enterprise-wide installations.

Terminal Charger (Single Slot Charging & Communications Cradle)

AML's terminal charger enables serial or USB (slave) communication between the M7220 and a host PC. The terminal charger charges the M7220 terminal battery and includes an extra slot for charging a spare battery. Dual color LED lights indicate when the terminal and spare battery are fully charged. The terminal charger accommodates the M7220 with or without the optional M7220 pistol grip handle. Includes external power-pack and line cord. (Part number: ACC-5925)

Four Position Terminal Charger

The four position terminal charger for the M7220 will simultaneously charge the internal batteries in four (4) M7220 terminals. Typical charge time is 4 hours. Dual color LED's provide charging status. One position of the charger also accommodates communications to the M7220 utilizing "pass through" RS-232 and USB ports. The four position charger is enclosed in a rugged metal housing and comes complete with external power-pack and line cord. (Part Number: ACC-5935)

Four Position Battery Charger

The four position battery charger for the M7220 terminal will simultaneously charge four (4) M7220 batteries. Typical charge time is under 2 hours (half the time of the standard charger). Dual color LED's provide charging status. Featuring a rugged metal housing for added durability, the four position battery charger comes complete with external power supply and line cord. (Part Number: ACC-7037)

Vehicle Mount Terminal Charger

AML's forklift or vehicle mount terminal charger charges the internal Li-Ion battery of the M7220 terminal, and holds the M7220 securely for use or transit in a forklift or other vehicle. A 9-pin RS-232 port is provided for connection of an external serial device such as a tethered bar code reader or a serial printer. An optional output of 5VDC at 1 Amp is available, primarily for powering a device such as a tethered bar code reader. The vehicle mount terminal charger supports DC input voltages ranging from 9VDC to 54VDC. (Part Number: ACC-7036)

Vehicle Mount Cradle (Non-charging)

The AML vehicle mount cradle secures the M7220 terminal for use or transit in a forklift or other vehicle. Constructed of powder coated steel for durability, the cradle is fully adjustable and can be dash mounted. The vehicle mount cradle allows easy access to the terminal keypad and accommodates the M7220 with or without the optional M7220 pistol grip handle. (Part Number: ACC-7038)

Multiple Holsters

AML offers two styles of nylon holsters that provide added protection for the M7220 wireless terminal. Each holster comes with an adjustable belt and secures the M7220 terminal comfortably on the user's hip for easy terminal accessibility. (Part numbers: CAS-7101B and CAS-7101H)

Pistol Grip Handle

The M7220 pistol grip handle is designed to accommodate users who prefer the point and shoot style of scanning. Installation is quick and easy. The pistol grip handle secures to the M7220 terminal with four screws and the battery is then relocated inside the pistol grip handle for easy change-out. (Part Number: ACC-5HND)

AML Support Agreements

For those customers who want the peace of mind that comes from guaranteed turnaround on warranty repairs, AML offers Extended Warranty, Extended Warranty Plus, and CARE Plan Extended Warranty (Critical Advanced Response Exchange) support agreements.

AML Extended Warranty

The AML Extended Warranty may be purchased for eligible products anytime during the term of the standard limited warranty. The Extended Warranty replaces the standard limited warranty, and provides the following added benefits:

- Additional warranty term, depending on the product
- Covers failures as a result of normal wear and tear*
- Covers firmware upgrades
- Four (4) business day turnaround, excluding time in transit
- No RMA number required
- Standard return freight (UPS Ground included)

AML Extended Warranty Plus

The Extended Warranty Plus provides all the coverage of the Extended Warranty, with additional coverage for the failure of external components regardless of fault. Generally this includes the case, LCD displays, keypads, overlays, lenses, and exposed connectors*. The Extended Warranty Plus is available for select AML products and replaces the standard limited warranty.

AML CARE Plan Extended Warranty

AML's CARE Plan (Critical Advanced Response Exchange) provides added security to those customers with mission critical requirements that demand next-business day response. The CARE Plan includes all the coverage of the Extended Warranty Plus, in addition to providing for an advance replacement unit shipped overnight upon request.

AML Maintenance Agreements

AML also offers Maintenance Agreements for select AML products no longer under warranty. For more information about AML maintenance agreements and the products that are covered, call 1-800-648-4452 or visit www.amltd.com.
